Severity of Incident.....Possibly Severe  
Contact Person .....Emily McKinley at [emckinley@stripe-a-zone.com](mailto:emckinley@stripe-a-zone.com)  
Location .....Stripe-A-Zone, Grand Prairie, Texas  
Department of Incident .....Field Operations

## **YOUR IMMEDIATE ATTENTION TO A SIMILAR SAFETY SITUATION COULD PREVENT A POSSIBLE SEVERE INJURY!**

Did you know that recently line on a paint machine broke as our employee was moving from one area to the next? It sprayed him in the face and chest but did not get into his eyes because he was wearing his safety glasses. Thankfully, wearing his safety glasses prevented possibly very serious eye injuries. Make sure that your employees are always wearing eye protection when operating any equipment. Additionally, make sure that you have SDSs available at all times when on job sites just in case an incident involving a chemical occurs on the job.
